Automation Through Innovation

SAGE 100 INVENTORY CONTROL

Automate Inventory Control Processes to Improve Efficiency

Rugged mobile computers with integrated barcode readers and wireless communications allow you to easily and efficiently track the movement of inventory throughout your business. Increase productivity and improve customer service by automating processes within your warehouse. **Schedule a demo.**

Key Features:

Seamless Integration
Allows for seamless, real-time integration into your Sage 100 system.

Wireless Functionality
Perform activities whenever and wherever needed including hybrid solution to continue to work even if there is an internet outage or lost connection.

Barcode Scanning
Provides automation to improve the efficiency and accuracy while reducing data entry errors.

Multi-bin
Ability store a single item in multiple "bins" throughout the warehouse and locate item quickly.

Optimize Order Picking
Streamline the order fulfillment process to improve the efficiency of warehouse workers and increase customer satisfaction.

Key Performance Indicators
Maintain visibility into inventory levels, turnover, receipts, transfers, issues, and more.

Why ScanForce?

ScanForce develops software solutions for Sage 100 users. Our warehouse management, manufacturing automation, inventory control, and mobile sales software empowers users to increase accuracy and efficiency, optimize workflows and improve profitability.
